

# Fall Home Maintenance Checklist

Is your home ready for the cold weather?

---

## What You Can Do:

- Clean or Replace HVAC Filter(s).
  - Check smoke and carbon monoxide detectors - replace batteries as needed.
  - Visually inspect water heater for corrosion and leaks.
  - Inspect your electrical outlets. Insure there are no fire hazards, such as over-loaded outlets or frayed wires.
  - Inspect the weather seal around all windows and doors. Replace any that are worn, cracked or missing.
  - Check both the inside and outside of your garage door.
- 

## What Else Needs to Be Done?

- Inspect the siding around your home. Check for signs of wear, cracks, missing siding and holes. If you find an area with an issue, perform the necessary repairs or hire someone who can.
- Clear your gutters of leaves and debris. If you don't feel comfortable on a ladder or on your roof, hire a professional.
- Hire a professional to inspect your roof for areas of wear or storm damage.
- Have your chimney inspected and cleaned if required.
- Schedule AccuTemp Heating & Cooling to do a yearly maintenance and safety check on your heating system
